

NOTE: This amplifier is intended for use on a Dante® Power-over-Ethernet (PoE) network and is not suitable for other applications. If you have purchased this product in error, please contact Revolution Acoustics for a Return Authorization number.

NOTE: This amplifier requires a 60W input from the PoE network. A PoE++ injector may be required. Visit revolutionacoustics.com/revnet for more information. Ubiquiti® Carrier PoE 50V (60W) Adaptors may be supplied by Revolution Acoustics upon request subject to availability.

Box Contents:

- One (1) RevNet PoE++ Amplifier (CV140 OR LZ220)
- Two (2) 2-pin Euroblock connectors (LZ220 only)
- One (1) 2-pin Euroblock connector (CV140 only)
- This instruction sheet

Input selection and other functions are achieved via your Dante network.

*Dante audio network 100/1000BaseT PoE++ 802.3bt compliant switch or mid-span injector (**60W port power**) is required for full output power.

This product is intended for use with a PoE++ switch. PoE and PoE+ switches will not deliver sufficient power for the rated power output of the amplifier. Please visit www.revolutionacoustics.com/revnet for information on PoE++ switches and PoE++ injectors.

Please see our full manual at revolutionacoustics.com/revnet for more installation information as well as safety considerations and warranty.
